SUMMARY

I am a Full Stack Web App Developer. Passionate about building scalable, intelligent web solutions and exploring the intersection of AI and software engineering. I am also exploring Agentic AI, Data Analytics and Machine Learning to develop innovative, automation-driven web applications.

KEY PROJECTS

Furniro – Furniture Marketplace

Developed a furniture marketplace with Next.js, NextAuth, and Stripe; includes a full admin dashboard for orders and product management.

github.com/abdullahN111/furniro-nextauth

Pak Alpha Manufacturing

Built and deployed a corporate site for a Riyadh-based company; handled domain, hosting, email setup, and brand materials.

github.com/abdullahN111/thepakalpha

AI Agents

Created AI agents using OpenAI Agent SDK with both CLI and web interfaces built on Next.js, Streamlit, and FastAPI.

github.com/abdullahN111/ai-agents/

Blog App Agent – AI Blog Generator

Built an authenticated blog platform using Next.js, FastAPI, and OpenAI Agent SDK; generates full articles from user-provided titles and perspectives.
